Possesses profound knowledge of British Standard Regulations. Highly skilled in the installation of new conduct wiring systems and in the wiring of electrical and control cables.

Career Summary

May 2014-Present : Electrical Technician : Standout Electrics, London

Overview

Oversee a team of 13 engineers in the operation and maintenance of British Standard electrical systems across various London sites; reporting to the Site Manager.

Key responsibilities:

- Facilitating the full rewiring of facilities in order to ensure ongoing adherence to British Standard Regulations.
- Administering the installation of new conduct wiring systems and coordinating the replacement of all electrical panels, lights, switched, and sockets.
- Leading the installation of new electrical components and the maintenance and repair of the existing electrical infrastructures.
- Spearheading the set-up of generators and transfer switches, enabling the provision of facilities that are not connected to the prime power source.
- Executing site inspections and the testing of all installed electrical systems, accurately recording results and ensuring compliance to British Standard Regulations.

Key achievements:

- Carried out the timely completion of assigned Planned Preventative Maintenance tasks (PPM's), which were completed to 97% efficiency on an annual basis.
- Procured, negotiated and ordered all materials required for reactive jobs, achieving an average cost saving of £35k.
